1965-1968

Regional Vice President

Richmond, Virginia

Lone Star Industries-Eastern Region

Chief operating officer for all cement and construction materials operations in Eastern and Southeastern states, including cement plants, ready mix plants, aggregate operations, and concrete products plants having sales of \$64 million.

1961-1965

Executive Director

Richmond, Virginia

Virginia Industrialization Group (Consultant to the Governor)

Responsible for the development and execution of a comprehensive plan to stimulate the economic growth of Virginia. This involved programs for recommending legislative changes, improving educational opportunities, organizing local and regional industrial development groups, organizing foreign trade missions, and promoting the economic advantages of the State generally. Results from the above programs were highly successful, particularly in attracting foreign investment into Virginia and increasing educational opportunities throughout the State.

1937-1961

General Electric Company

Various locations

Joined the company in its business training program for college graduates, and then carried out various assignments, including sales representative for the construction materials division.

Served in a number of assignments, primarily in the area of government, community and employee relations. Government relations work included responsibility for corporate liaison in Washington, D.C. with government agencies and the Congress. Also represented the company with numerous trade associations and other groups during these years. Three years were devoted to manufacturing plant and research laboratory location work during the company's major expansion program during the 50's.
